Automate Extraction of Invoice Details

BY: Shane Artis

# Logging into ACME Website

Built a process using the Modern Design Experience that automates the extraction of invoice details.

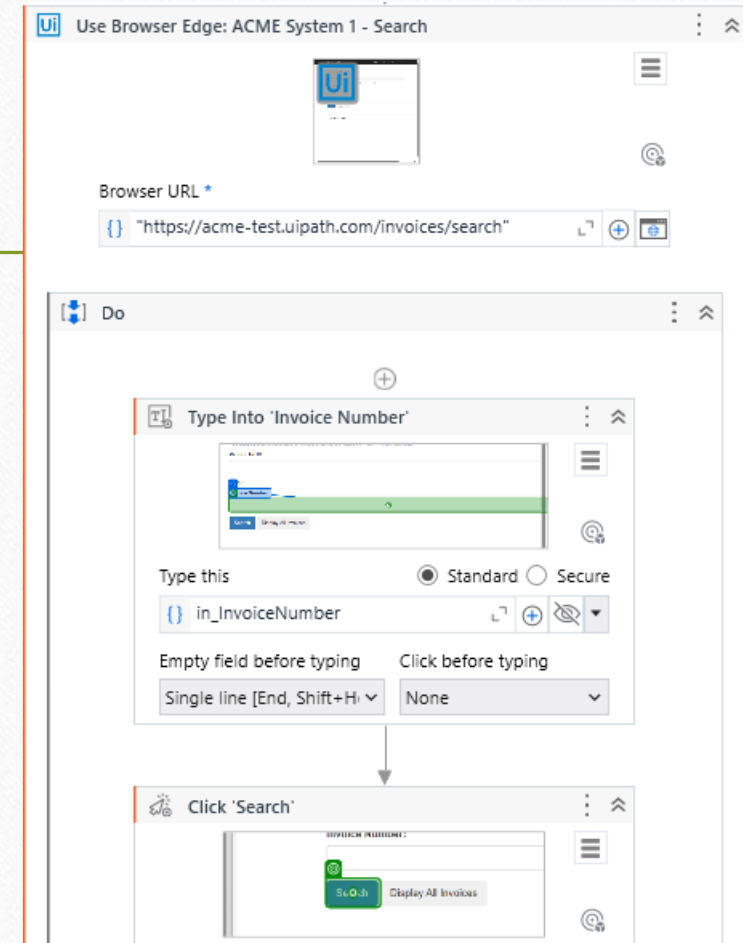

1. Read an input Excel file with the invoice numbers.
2. Sign in to the ACME website.

# Searching for Invoices

3. Navigate to the invoice search page.
4. For each invoice number in the Excel file, search for the invoice number.

# Extracting Invoice

5. Extract the invoice details, including Vendor Tax ID, Invoice Item, Total, and Date.

The screenshot displays a workflow editor with the following components:

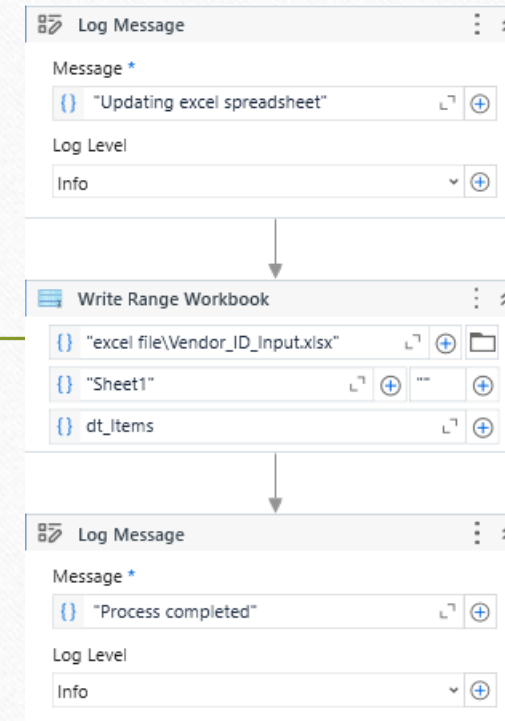

- For Each Row in Data Table**:
  - Data Table: `dt_Items`
  - Item: `CurrentRow`
- Body**:
  - search for current invoice.xml - Invoke Wo...**:
    - Workflow file name: `"search for current invoice.xml"`
    - Buttons: `Import Arguments` (1), `Open Workflow`
  - extract invoice details.xml - Invoke Workfl...**:
    - Workflow file name: `"extract invoice details.xml"`
    - Buttons: `Import Arguments` (0), `Open Workflow`
  - navigate new.xml - Invoke Workflow File**:
    - Workflow file name: `"navigate new.xml"`
    - Buttons: `Import Arguments` (0)
- Multiple Assign** (A+B):

Save to	Value to save
<code>CurrentRow("VendorTaxID")</code>	<code>VendorTaxID</code>
<code>CurrentRow("InvoiceItem")</code>	<code>InvoiceItem</code>
<code>CurrentRow("Total")</code>	<code>Total</code>
<code>CurrentRow("Date")</code>	<code>InvoiceDate</code>

Buttons: `Add`

# Write in Excel File

6. Write the extracted invoice details to an Excel file stored in the project folder.
